17. VISUAL AESTHETICS.....17-1

## 17. Visual Aesthetics

Visual aesthetics baseline data were collected during 2004 as described in the 2004 progress report. No additional data are being collected in 2006. Data on visual aesthetics for the Iniskin Peninsula will be collected once the location of the proposed powerline corridor is confirmed.

The visual aesthetics baseline data will be presented in the environmental baseline document (EBD) prior to filing of permit applications.
